

# Big Data Management Infrastructure

## Estimated Time

- 2 - 3 Weeks

Informatica Big Data Management offers flexible data integration, governance and security solutions on Hadoop. To get the best possible results from this product, choose our Informatica-certified experts to drive your initial Big Data Management work plan.

## Why PDI?

- We utilize the Informatica-approved velocity methodology.
- Our Informatica-certified technicians have extensive experience with Informatica products.

Pacific Data Integrators is a long-standing Informatica partner. As a reseller, we have the added benefit of not only selling and servicing Informatica products, but also adjacent technologies.

Our experts will install and configure Informatica Big Data Management for you while utilizing Informatica best practices, guaranteeing the highest possible ROI from your Informatica product.

In this package, Pacific Data Integrators will review your current environment and assess the big data challenges your company is facing. This will allow us to determine which product capabilities will best meet your unique needs, and to plan a deployment to deliver maximum value.

If needs outside the original baseline deployment arise, such as performance tuning or architectural guidance, additional time may be added to the execution of this deployment to assist the customer with the additional requirements.

## Contact PDI

For more details about Pacific Data Integrators contact us at [informatica@pacificdataintegrators.com](mailto:informatica@pacificdataintegrators.com) or visit our website at [pacificdataintegrators.com](http://pacificdataintegrators.com).

## As a part of this package, Pacific Data Integrators will:

- Review Pre-Installation Requirements
- Review Security Configuration
- Review Architecture & Strategy
- Assess Client's Readiness for Platform Setup
- Install Informatica BDM in One (1) Environment
- Assess Post-Installation Configuration
- Run Connectivity Tests
- Provide Data Quality OR Address Validation configuration and use case guidance, depending on client's need.
